Objective

I have a strong foundation in web development with MERN and a deep interest in AI, combining both with a product driven mindset. Always exploring, learning, and creating, I'm excited to bring my curiosity and adaptability to a team where I can grow and contribute.

Experience

AI Lead — Datasynx

(Contract-based) | July 2025-Feb 2026

Leading the AI engineering team and architecting the core AI module for the platform.

- Managing end-to-end development of AI components used by organizations.
- Designed modular agent workflows and oversaw team coordination, documentation, and technical planning.

(Details limited due to NDA.)

AI Automation Assistant

(Contract-based) | June 2025 - Apr 2026

Built automation workflows using n8n, integrating tools like Gemini, Airtable, Make, and Google Workspace. Designed scalable AI-driven automations, connecting LLMs with external APIs, databases, and custom business workflows.

Software Engineering Intern

Forge Internship Program, Minas Code

June 2024-August 2024

Co-founded a simulated start-up and built an MVP end-to-end, winning both the pitch and demo. Skilled in MERN, Next.js, JWT auth, LiveKit, ShadCN, Zustand, and team collaboration.

Projects

- DataSynx (AI Agent Platform for Organizations): Contract-based project where I lead the AI engineering module. Built an extensible AI agent capable of handling organization-level workflows and interactions. (Details restricted due to NDA.)
- AI-powered Patient Management App (FYP): Currently building a full-stack patient management system with an integrated AI agent for appointment booking, initial diagnosis, and prescription viewing. Powered by LangGraph, Django, and Supabase.
- Chameleon (Language Exchange Platform): Built a language exchange platform with Next.js, Node.js, and MongoDB. Enabled real-time chat, video and user matching based on language and interests. Focused on a user-friendly interface.
- Prompt-based AI Video Editor: Created a prompt-based video editor that edits any video based on a simple user prompt. No editing skills required. Developed using OpenCV, Ultralytics, GeminiAI API, and streamlit for the UI.

Skills

- Languages: Python, JavaScript (ES6+), C++, C, SQL, HTML/CSS, Typescript
- Frontend: Next.js, React, Tailwind CSS, EJS templates
- Backend: Django REST Framework, Node.js, Express.js, RESTful API Design, Nest.js, GHL
- AI & Agents: LangChain, LangGraph, Flowise, Vector Databases (pgvector), RAG pipelines, N8N, MAKE, VAPI
- Devops & Infra: Docker, Coolify, AWS (EC2, S3), PostgreSQL, MongoDB, Git/GitHub, GitHub Actions

Education

2022-Current — Bachelor's: Computer Science

(Comsats University Islamabad Lahore) — CGPA: 3.47

Activities

- Co-lead AICP (AI Community of Pakistan)
Helping build and run the AI community, organizing events, and getting students involved.
